

RETROFITS

If you need to retrofit your furnace, Southeastern can provide experienced field labor and supervise the job to make certain it's done right.

We can—

- Upgrade, alter, and/or modernize your equipment.
- Furnish and apply energy-saving devices, including recuperators, fiber and monolithic linings, combustion systems, and controls.
- Handle environmentally hazardous material

REBUILDS / REPAIRS

Southeastern can repair, replace, and/or upgrade your furnace linings, hearths, handling systems, and internal alloy and Carbon bake furnaces

We can—

- Handle demolition and debris removal.
- Fabricate, modify, or repair steel.
- Supply and install refractory.
- Machine and/or assemble custom-built equipment, which may include material handling, upgrading, or replacing parts or systems.

Whatever your furnace needs are Southeastern has the Experience
